Chapter 1: Overview

CRSP provides SAS, ASCII, and R versions of the CRSP/Compustat Merged Database. Long requested by our subscribers, they are designed to be used independently of other CRSP data products or can be joined with the CRSP Stock files.

The files allow users to bypass access tools and work directly with the files in applications of choice. CRSP link files are provided to allow linking with CRSP stock files. Over 200 Compustat files are consolidated into approximately 90 files and organized in an intuitive manner that facilitates ease of use. PERMNOs and PERMCOs are provided and included in company and security data files. Two versions of each of the formats are available for download:

- CFZ contains all files with Compustat data and CRSP Link data
- CLZ contains Link Data only

Files for all formats share common names with the following File Extensions:

- SAS: *.sas7bdat
- ASCII: *.dat
- R: *.rds

Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

Chapter 2: CCM File Types

The CCM data are categorized in six broad file types:

- Metadata
- Company Data
- Security Data
- Global Data
- Index Data
- Reference Data
- Link Data

Metadata

Information about the files and data items contained in this data product to facilitate usage and understanding of the data.

File Header	Name	File Description	File Name
D_ItemInfo	CRSP File Information	Includes item names and descriptions, default KEYSETs, Compustat mnemonics, data type and other information	D_ItemInfo
D_CommonInfo	Common Information	Items common among tables	D_CommonInfo
D_FileInfo	CRSP File Information	Includes file names and descriptions, summary data about the file, such as primary KEY fields and number of fields	D_FileInfo
D_ItemDensity	CRSP Item Density	Provides the following for KEYSET based items: number of non-missing values, number of unique GVKEYs, and data ranges the item/keyset combination is found	D_ItemDensity
D_KeysetInfo	CRSP KEYSET Information	Includes KEYSET TAGs and descriptions	D_KeysetInfo
D_ItemRelationship	CRSP Item Relationship	Quick reference for the availability of related items such as a footnote, datacode and another frequency	D_ItemRelationship
D_FiscalPeriod	CRSP Fiscal Period	calendar and trading date ranges to fiscal YEAR and month mapping table	D_FiscalPeriod

D_ItemInfo

The D_ItemInfo table contains metadata about each data item in the CRSP/Compustat SAS and ASCII files. This table serves as a reference guide. Click here for the full table of variables.

Column Header	Item Name	Item Description
ItemName	Item Name	CRSP-assigned item mnemonic. Most often matches item header and Compustat's Xpressfeed mnemonic
ItemHdr	Item Header	CRSP-assigned item header. Most often matches CRSP item name and Compustat's Xpressfeed mnemonic
XpressfeedMnemonic	Xpressfeed Mnemonic	Compustat – assigned mnemonic. CRSP has matched Compustat's mnemonic in all cases other than those where the mnemonic already existed in a CRSP product. Differences are flagged
ItemNameType	Item Name Type Code	Code used to identify the relationship between the Name, Item Header, and Xpressfeed Mnemonic. Codes and descriptions follow this table
ItemType	Item Type Code	Two-character code used to define item type. Codes and descriptions follow this table

©2026 Morningstar, Inc. All rights reserved. The Morningstar name and logo are registered marks of Morningstar, Inc. Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

Column Header	Item Name	Item Description
ItemDesc	Item Description	For Compustat data items, the full Compustat item name. If a CRSP item – full description
DefaultKeyset	Default KEYSET	Numeric code that identifies the combination of KEYs that serves as the default for each item
DefaultKeysetTag	Default KEYSET TAG	Character code that identifies the combination of KEYs that serves as the default each item. Each TAG is associated with one numeric KEYSET
FileDimKey	File Dimension KEY	Unique surrogate KEY assigned to each file
FileTag	File TAG	Short abbreviation that identifies the type of data included in the file
ItemSeqNum	Item Sequence Number	Number representing the column position of the item with ITs file
CalendarType	Calendar Type Code	Character code that identifies the calendar type of the data within the file
CalendarFreq	Calendar Frequency	Data frequency defined for each item with ITs file
SASDataType	SAS Data Type Code	Numeric Code defining the data type: 1 = numeric, 2 = character
SASFieldSize	SAS Field Size	The length or number of characters allocated to the item
SASFormat	SAS Format	The display length or number of characters for an item
ItemHasDataFlag	Item Has Data Flag	Y/N flag indicating that the item is populated with data (Y) or is not (N)
ItemDensityFlag	Item Density Flag	Y/N flag indicating
ItemActiveFlag	Item Active Flag	Y/N flag indicating that the item is currently active and updated with new data (Y) or is a legacy item that CRSP is retaining for continuity (N)
ItemKey	Item KEY	Unique surrogate

Item Name Type Code

ItemNameType	Description
AM	All Match - ItemtName = ItemHdr = XpressfeedMnemonic
CH	XpressfeedMnemonic exists, but ITEMNAME <> XpressfeeMnemonic and Item Name <> Item Hdr
CN	XpressfeedMnemonic exists, but ITEMNAME <> XpressfeeMnemonic and Item Name = Item Hdr
FF	Flat File Specific Field so XpressfeedMnemonic is null/empty
MD	Meta Data field - so XpressfeeMnemonic is null/empty

Item Type Code

ItemNameType	Description
DC	Data Code
DK	Data KEY
DS	Derived Structure
EB	Event Beg Date
EE	Event End Date
EK	Event KEY

©2026 Morningstar, Inc. All rights reserved. The Morningstar name and logo are registered marks of Morningstar, Inc. Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

ItemNameType	Description
FF	Flat File Item
FK	Fiscal YEAR KEY
FN	Foot NOTE
IT	Data Item
KY	KEYSET Item
MD	Meta Data File Item
PK	Primary KEY
SF	Structure Field
SI	Structure Item
SK	Security KEY - translation of IID into sequence number
SY	System item, reserved for usage by CRSP

D_CommonItems

The Common Items table is a subset of the D_ItemInfo table with the same layout. The items within the table are restricted to those that are used in multiple tables.

D_FileInfo

This file contains a list of each data file, and includes the description, the number of columns, the primary key for the file, the data frequency/calendar, and the default keyset. The intent of this file is to provide normalized information about the files so that the item table can be narrower and more manageable and provide information that allows a user to more easily find data fields. Click here for the full table of variables.

Column Header	Item Name	Item Description
FileDimKey	File Dim Key	Unique surrogate key assigned to each file
FileParentKey	File Parent Key	Numeric representation of the parent file from which each file is built
FileTag	File Tag	Abbreviated name associated with each file
FileParentTag	File Parent Tag	Abbreviated name associated with each parent file to which the File Parent KEY is associated
FileSeqNum	File Sequence Number	The order of each file positioning within each File Parent group
FileHeader	File Header	Short Name associated with each file
FileType	File Type Code	2-character code defining the type of file
FileTypeName	File Type Name	Name associated with the file type code: metadata, company data, security data, global data, index data, reference data
CalendarType	Calendar Type Code	Character code that identifies the calendar type of the data within the file
CalendarFreq	Calendar Frequency	Data frequency defined for each item with its file
DefaultKeyset	Default Keyset	Numeric code that identifies the combination of keys that serves as the default for each file
DefaultKeysetTag	Default Keyset Tag	Character code that identifies the combination of keys that serves as the default each file. Each tag is associated with one numeric keyset

©2026 Morningstar, Inc. All rights reserved. The Morningstar name and logo are registered marks of Morningstar, Inc. Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

Column Header	Item Name	Item Description
FileSASName	File SAS Name	File name with .sas7bdat extension
FileASCIIName	File ASCII Name	File name with .dat extension
FileColumnCnt	File Column Count	Number of columns in the file – includes keys and data columns
DataColumnCnt	Data Column Count	Number of non-key columns in the file
FileKeyCnt	File Key Count	Number of keys in the file
FileKeyName1	File Key Name 1	The name of each key used in the file. For each file, the number of named keys used will be equal to the file key count
FileKeyName2	File Key Name 2	The name of each key used in the file. For each file, the number of named keys used will be equal to the file key count
FileKeyName3	File Key Name 3	The name of each key used in the file. For each file, the number of named keys used will be equal to the file key count
FileKeyName4	File Key Name 4	The name of each key used in the file. For each file, the number of named keys used will be equal to the file key count
FileKeyName5	File Key Name 5	The name of each key used in the file. For each file, the number of named keys used will be equal to the file key count
FileKeyName6	File Key Name 6	The name of each key used in the file. For each file, the number of named keys used will be equal to the file key count
FileDesc	File Description	Long description of the file
FileActiveFlg	File Active Flag	Y/N flag indicating whether or not the file is updated with each data release. If N, IT exists for retention of history and continuity

D_ItemDensity

This file provides information about specific items, keysets, or item/keyset combinations about how densely the item, by keyset is populated. This information can direct users to the items and keysets they wish to access.

Column Header	Item Name	Item Description
ItemName	Item Name	CRSP-assigned item mnemonic. Most often matches Item Header and Compustat's Xpressfeed mnemonic
KeySet	KeySet	Numeric code that identifies the combination of keys for each item
KeysetTag	KeySet Tag	Character code that identifies the combination of keys for each item. Each tag is associated with one numeric keyset
CalendarType	Calendar Type Code	Character code that identifies the calendar type of the data within the file
CalendarFreq	Calendar Frequency	Data frequency defined for each item with ITs file
CRSPIDCnt	CRSP ID Count	Number of distinct security identifiers contain data
ExistingCnt	Existing Count	Number of non-missing fields that are populated with data
FirstAvailable	First Available Date	First date for which non-missing data exists
LastAvailable	Last Available Date	Last date for which non-missing data exists

©2026 Morningstar, Inc. All rights reserved. The Morningstar name and logo are registered marks of Morningstar, Inc.
Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

D_KeysetInfo

Keyset is the CRSP assigned key to collapse multiple fields into a single integer key. The most common use of it is to collapse into a single key, four fields: CONSOL (Consolidation Type), DATAFMT (Data Format), INDFMT (Industrial Format), and POPSRC (Population Source). This file provides information about each keyset.

Column Header	Item Name	Item Description
Keyset	Keyset	Numeric code that identifies the combination of KEYs for each item
KeysetTag	Keyset Tag	Character code that identifies the combination of KEYs for each item. Each TAG is associated with one numeric KEYSET
KeysetDesc	Keyset Description	Lists the relevant fields that make up the KEYSET that may include any or all values for Consolidation Type, Data Format, Industrial Format, Population Source
KeysetType	Keyset Type Code	Character field that identifies the character of the KEYSET
KeysetDefaultFlg	Keyset Default Flag	Y/N flag to determine if a KEYSET ever is used as the default KEYSET in a file (Y), or is never used as the default KEYSET in a file (N)
KeyCnt	Keyset Count	
KeyName1	Keyset Name 1	
KeyValue1	Keyset Value 1	
KeyName2	Keyset Name 2	
KeyValue2	Keyset Value 2	
KeyName3	Keyset Name 3	
KeyValue3	Keyset Value 3	
KeyName4	Keyset Name 4	
KeyValue4	Keyset Value 4	
KeyName5	Keyset Name 5	
KeyValue5	Keyset Value 5	
KeyName6	Keyset Name 6	
KeyValue6	Keyset Value 6	
KeysetActiveFlag	Keyset Active Flag	

D_ItemRelationship

This table lists each business concept or Base Item, and associates all related items to the concept.

Column Header	Item Name	Item Description
BaseItemKey	Base Item Key	Unique numeric representation associated with each base item
BaseItemName	Base Item Name	Compustat Item name associated with a business concept
BaseItemDesc	Base Item Description	Long name associated with each base item, omitting frequency, footnote, or data code identification
AnnualItemName	Annual Item Name	Item associated with BaseItemDesc
AnnualFootnoteName	Annual Footnote Name	Item associated with BaseItemDesc

©2026 Morningstar, Inc. All rights reserved. The Morningstar name and logo are registered marks of Morningstar, Inc.
Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

Column Header	Item Name	Item Description
AnnualDataCodeName	Annual Data Code Name	Item associated with BaseItemDesc
QtrlyItemName	Quarterly Item Name	Item associated with BaseItemDesc
QtrlyItemFootnoteName	Quarterly Footnote Name	Item associated with BaseItemDesc
QtrlyDataCodeName	Quartelry Data Code Name	Item associated with BaseItemDesc
SemiAnnItemName	Semi-Annual Item Name	Item associated with BaseItemDesc
SemiAnnItemFootnoteName	Semi-Annual Footnote Name	Item associated with BaseItemDesc
SemiAnnDataCodeName	Semi-Annual Data Code Name	Item associated with BaseItemDesc
YTDItemName	Year-to-Date Item Name	Item associated with BaseItemDesc
YTDtemFootnoteName	Year-to-Date Footnote Name	Item associated with BaseItemDesc
YTDDataCodeName	Year-to-Date Data Code Name	Item associated with BaseItemDesc
OtherItemName	Other Item Name	Not populated in table
OthertemFootnoteName	Other Footnote Name	Not populated in table
OtherDataCodeName	Other Data Code Name	Not populated in table
OtherType	Other Type	Not populated in table

D_FiscalPeriod

This file provides a mapping for period and fiscal year to calendar and trading ranges, facilitating understanding and linking of data between CRSP and Compustat. Click here for the full table of variables.

Column Header	Item Name	Item Description
FiscalPeriod	Fiscal Period	Joins to Compustat columns FYYYY (1984, 2005), FYYYYQ (19841, 19842, 19843, 19844, 19851), FYYYYS (19841, 19842, 19851)
FiscalYearEndMonthNbr	Fiscal YEAR End Month	Joins to Compustat at FYR, FYRA, FYRQ, FYRS – Numbers 1 – 12 for month number. Zero exists in raw data and are treated as December
FiscalPeriodTypeCd	Fiscal Period Type	ANN, QTRm Sam YTD in the LinkFiscalPeriodAll file, all four of these types will be present. In LINK files subset by type, column will hold uniform codes
FiscalPeriodStart	Fiscal Period Start	Start of fiscal period in YYYYMMDD format (e.g. 1984 Dec ANN is 19840101)
FiscalPeriodEnd	Fiscal Period End	End of fiscal period in YYYYMMDD format (e.g. 1984 Dec ANN is 19841231)
FiscalPeriodCRSPStart	Fiscal Period CRSP Start	Start of CRSP price data available for this LINK in YYYYMMDD format. Narrowed by trading days in the period (e.g. 19840101 has a trading start of 19840103) and by the PERMNO data availability in CRSP
FiscalPeriodCRSPEnd	Fiscal Period CRSP End	End of CRSP price data available for this LINK in YYYYMMDD format. Narrowed by trading days in the period (e.g. 19841231 has a trading end of 19831230) and by the PERMNO data availability in CRSP
FiscalPeriodStartDt	Fiscal Period Start Date	Same as Fiscal Period Start but in YYYY-MM-DD date format
FiscalPeriodEndDt	Fiscal Period End Date	Same as Fiscal Period End but in YYYY-MM-DD date format
FiscalPeriodCRSPStartDt	Fiscal Period CRSP Start Date	Same as Fiscal Period CRSP Start but in YYYY-MM-DD date format
FiscalPeriodCRSPEndDt	Fiscal Period CRSP End Date	Same as Fiscal Period CRSP End but in YYYY-MM-DD date format

Global Data

Group contains five reference data files that contain global economic and currency-related data.

Parent Group	File Header	File Long Name	File Name
Reference Data	Currency	Global Currency Data	Currency
	Economic Indicator	Economic Indicator Data	EconomicIndicator
	Exch Rate - Daily	Daily Exchange Rate	ExchangeRateDaily
	Exch Rate - Mthly	Monthly Exchange Rate	ExchangeRateMonthly
	Exch Rate - Mthly Avg	Monthly Exchange Rate Averages	ExchangeRateMonthlyAverages

Index Data

Index Data is divided into 4 subgroups and 9 individual files.

Parent Group	File Header	File Long Name	File Name
S&P Index Values	Monthly Index Data	S&P Index Values - Monthly	IndexDataMonthly
	Daily Index Data	S&P Index Values - Daily	IndexDataDaily
Index Descriptors	CCM Header and Ranges	Company Master	IndexHeaderandRanges
	Index Header	Idx_Index Header	IndexHeader
	Index Header - pre GICS	S&P Index Header	SPIndexHeaderPreGICS
Quarterly Index Values	Index Per Desc - QTR	Index Quarterly Period Descriptor Data	IndexPeriodDescriptorQuarterly
	Index Quarterly	Index Quarterly Data	IndexQuarterly
Annual Index Values	Index Per Desc - Annl	Index Annual Period Descriptor Data	IndexPeriodDescriptorAnnual
	Index Annual	Index Annual Data	IndexAnnual

Reference Data

Files contain data that contains codes and descriptions to codes.

Parent Group	File Header	File Description	File Name
Reference	Constituent	Constituent Reference	ReferenceConstituent
	Exchange Tier	Exchange Tier	ReferenceExchangeTier
	Footnote	Footnote Reference	ReferenceFootnote
	GICS	GICS Reference	ReferenceGICS

Parent Group	File Header	File Description	File Name
	Reference Numbers with Status Field	Collapsed reference files with Status and Numeric Codes	ReferenceNumbersWithStatus

Link Data

There are 7 files included in the link-only product.

Link Files	File Extensions
D_FiscalPeriod	
LinkHistory	
LinkFiscalPeriodAll	SAS: *.sas7bdat
LinkFiscalAnnualDefault	ASCII: *.dat
LinkFiscalQuarterlyDefault	R: *.rds
LinkFiscalSemiAnnualDefault	
LinkFiscalYTDDefault	

The CRSP/Compustat Link-Only files are a subset of the full CRSP/Compustat SAS and ASCII data files. The set consists only of files used for linking the CRSP and Compustat data. These files are intended for use with the CRSP SAS and ASCII stock files and Compustat data files that contain GVKEYs and IIDs.

- **D_FiscalPeriod** - Metadata file with calendar and trading date ranges to fiscal year and month mapping table.
- **LinkHistory** - This is the "raw" link file that holds what is in the production CRSP/Compustat Merged Database for use with CRSPSift and CRSP Utilities. This file is included for the following:

  - It provides continuity for users of the current link history
  - It works well "as is" for calendar based links
  - It offers transparency

- **LinkFiscalPeriodAll** - This file contains the links for all fiscal periods in the CCM Fiscal files. This includes:

  - Missing links - no PERMNO for this period
  - All Fiscal Period Types - Annual, Quarterly, Semi-Annual, and YTD
  - All Links including non-primary, duplicates, etc. with a rank number assigned

- **LinkFiscalAnnualDefault, LinkFiscalQuarterlyDefault, LinkFiscalSemiAnnualDefault, LinkFiscalyTDDefault**

  - These four files are the Rank 1 for each respective Fiscal Period Type
  - These four files are identical in structure to the LinkFiscalPeriodAll table, even though two fields FiscalPeriodType will be uniform for each file and LinkRank will be 1 for all
    These files make transparent the values used for PERMNO and PERMCO for the fiscal period files so that CFZ and CLZ subscribers can "compare" work

©2026 Morningstar, Inc. All rights reserved. The Morningstar name and logo are registered marks of Morningstar, Inc.
Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

Link History

Link history file is directly from CRSP's legacy CRSP\Compustat Merged Database and provided for compatibility with information in CRSP production databases.

ItemID	Item Name	Item Description
KYGVKEY	GVKEY	Compustat identifier – part of all base tables
LinkDt	Link Date	Link history start date in YYYY-MM-DD format
LinkEndDt	Link End Date	Link history end date in YYYY-MM-DD format
LPERMNO	PERMNO	CRSP unique security identifier, included in all base tables
LPERMCO	PERMCO	CRSP unique company identifier, included in all base tables
LIID	Issue Identifier	Compustat issue identifier, used with GVKEY for security data
LinkType	Link Type Code	Each Link is given a code that describes the Link
LinkPrim	Primary Link Code	Code indicates whether the link is with Compustat's marked primary security during the link range

Link Fiscal Period All

Link Fiscal Annual Default

Link Fiscal Quarterly Default

Link Fiscal Semi-Annual Default

Link Fiscal Year-to-Date Default

All files are formatted the same. Link Fiscal Period All contains all data. Default files are subset by fiscal period type for ease of use.

ItemID	Item Name	Item Description
KYGVKEY	GVKEY	Compustat identifier – part of all base tables
LinkDt	Link Date	Link history start date in YYYY-MM-DD format
LinkEndDt	Link End Date	Link history end date in YYYY-MM-DD format
LPERMNO	PERMNO	CRSP unique security identifier, included in all base tables
LPERMCO	PERMCO	CRSP unique company identifier, included in all base tables
LIID	Issue Identifier	Compustat issue identifier, used with GVKEY for security data
LinkType	Link Type Code	Each link is given a code that describes the Link
LinkPrim	Primary Link Code	Code indicates whether the link is with Compustat's marked primary security during the link range
LinkMadeCnt	Link Made Count	Number of all links available for a GVKEY, FiscalPeriod, FiscalEndMonthNbr, FiscalPeriodType combination. If greater than 1, an indicator that some less common situation exists
LinkPERMNOCnt	Link PERMNO Count	Number of distinct linked PERMNOs. If greater than 1, aggregating CRSP data might need care
LinkNonZeroPERMNOCnt	Link Non-Zero PERMNO Count	Number of distince non-zero (non-missing) linked PERMNOs. If greater than 1, aggregating CRSP data might need care

ItemID	Item Name	Item Description
FiscalPeriodCRSPStartDt	Fiscal Period CRSP Start	Start of CRSP price data available for this link in YYYY-MM-DD format. Narrowed by trading days in the period (e.g. 1984-01-01 has a trading start of 1984-01-03) and by the PERMNO data availability in CRSP
FiscalPeriodCRSPEndDt	Fiscal Period CRSP End	End of CRSP price data available for this link in YYYY-MM-DD format. Narrowed by trading days in the period (e.g. 1984-12-31 has a trading end of 1983-12-30) and by the PERMNO data availability in CRSP
LinkDt	Link Date	Link history start date in YYYY-MM-DD format
LinkEndDt	Link End Date	Link history end date in YYYY-MM-DD format

Link Range Type

Codes and descriptions for Link Range Type, found in the Link Fiscal files, are provided in this table for easy reference. Codes are organized in rank order from most common to rare.

Code	Link Type Name	Link Type Description	Count	% of Total
TP	Total Period	Primary link covers total fiscal trading period covered by CRSP data	2,652,826	56.3%
ZP	Zero Primary link	Primary link exists, but PERMNO is missing, anywhere in the period	1,521,332	32.3%
ZN	Zero Non-Primary	Non-primary link exists, but PERMNO is missing, anywhere in the period	223,514	4.7%
EP	End Period	CRSP data range begins before the primary link begins, primary link exists at the end of fiscal trading period covered by CRSP data	112,088	2.4%
NP	Non-Primary	Non-primary link exists anywhere in the period for a non-missing PERMNO	98,193	2.1%
BP	Beginning Period	Primary link exists at the start of the fiscal trading period covered by CRSP data	34,134	0.7%
AL	After link	Fiscal period entirely after the link history ends	28,329	0.6%
BL	Before link	Fiscal period entirely before the link history begins	24,619	0.5%
GP	Gap Period	Fiscal period is in a gap period (links sometime before and sometime after) of the link history	10,297	0.2%
MP	Middle Period	Primary link exists with only the middle of the fiscal trading period covered by CRSP data	2,680	0.1%
BC	Beginning Calendar	Primary link extends ends before the start of the fiscal trading period, but on or after the start of the fiscal period, e.g. link ends on Monday 1/2/2017, which is before the first trading day (Tuesday 1/3/2017), but after the start of the fiscal period (1/1/2017)	31	0.0%
EC	End Calendar	Primary link extends starts after the end of the fiscal trading period, but on or before the end of the fiscal period, e.g. link starts on Saturday 12/30/2018, which is after the last trading day (Friday 12/29/2018), but before the end of the fiscal period (12/31/2018)	18	0.0%

Chapter 3: Individual File Layouts

Company Data

The following sections of this guide provide layouts for each of the individual Compustat files under Company Data. The layouts contain a sampling of rows from each file to give a sense of the data and organization. Each file includes an active link that will redirect to a complete html file of the full table layout for review. Subscribers are encouraged to reference Compustat documentation for full data definitions and in-depth information.

Security Data

The following sections of this guide provide layouts for each of the individual Compustat files under Security Data. The layouts contain a sampling of rows from each file to give a sense of the data and organization. Each file includes an active link that will redirect to a complete html file of the full table layout for review. Subscribers are encouraged to reference Compustat documentation for full data definitions and in-depth information.

Reference Data

The following sections of this guide provide layouts for each of the individual Compustat files under Reference Data. The layouts contain a sampling of rows from each file to give a sense of the data and organization. Each file includes an active link that will redirect to a complete html file of the full table layout for review. Subscribers are encouraged to reference Compustat documentation for full data definitions and in-depth information.

Appendix A: Flat Files Default Linking Process

CRSP identifies all fiscal periods (year, half-year, quarter, month) for all of the data files and for all of the gvkeys. For each of these fiscal periods, we have a 10-step process to find the link that we will use for that fiscal period. All steps are run and the results are placed in a list that is sorted by step number and by link end date within the step number. The first element in the sorted list is given a rank of 1 and is used for that fiscal period.

Remember that CRSP uses two fiscal period concepts: the range of calendar days that make up the fiscal period (fiscal period start/end) and the range of trading days that exist within the fiscal period (fiscal period CRSP start/end). These ranges are different if the fiscal period starts or ends on a weekend, holiday, or any other time that there is no trading.

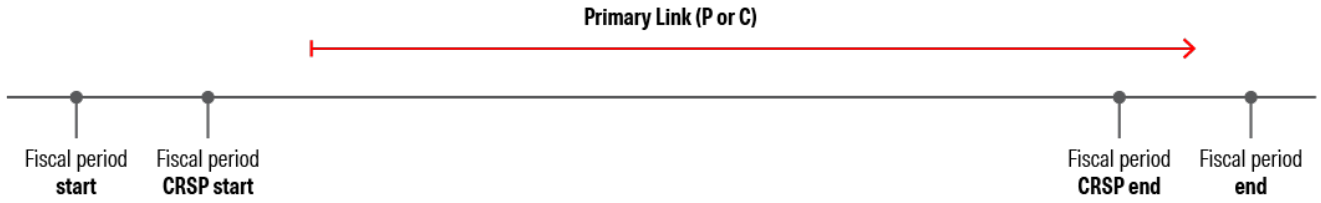

STEP 1

Look for a primary link (P or C) that covers the entire fiscal trading period.

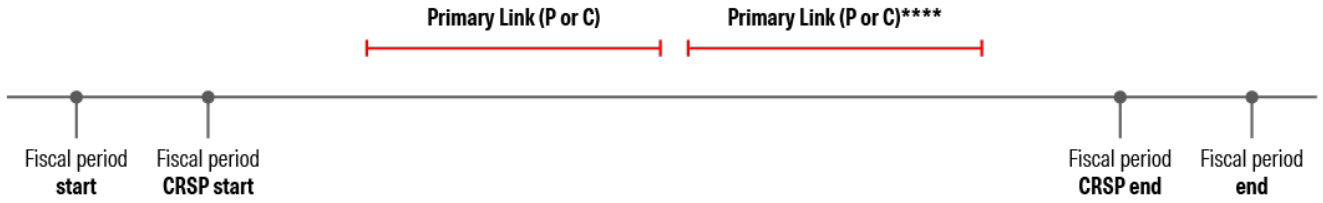

STEP 2

Look for a primary link (P or C) that starts after the beginning of the start of the fiscal trading period and ends after the end of the fiscal trading period.

STEP 3

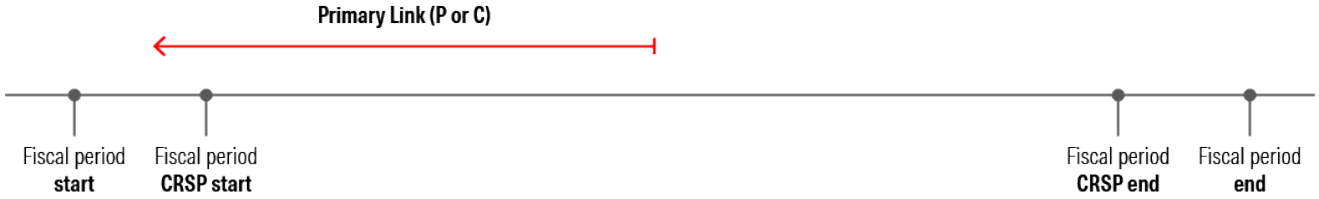

Look for primary links (P or C) that start after the beginning of the start of the fiscal trading period and end before the end of the fiscal trading period. It is possible that there are multiple matches. If so, the matches are ranked by the latest end date.

©2026 Morningstar, Inc. All rights reserved. The Morningstar name and logo are registered marks of Morningstar, Inc. Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

STEP 4

Look for a primary link (P or C) that starts before the beginning of the start of the fiscal trading period and ends before the end of the fiscal trading period.

STEP 5

Look for a primary link (P or C) that starts after the end of the fiscal trading period but before the end of the fiscal calendar period.

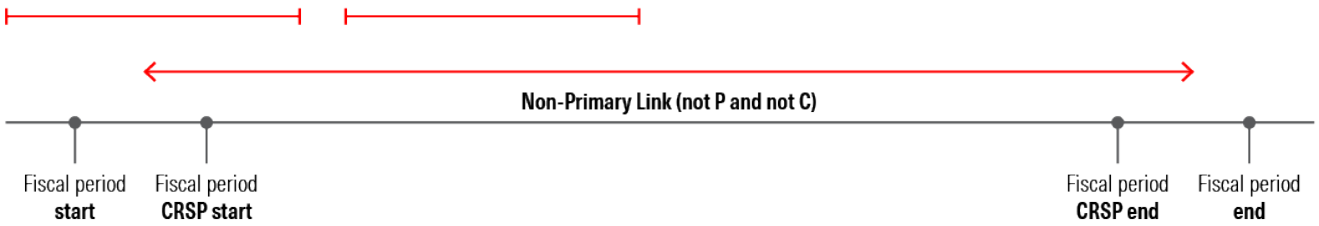

STEP 6

Look for a primary link (P or C) that begins after the start of the fiscal calendar period but before the start of the fiscal trading period.

STEP 7

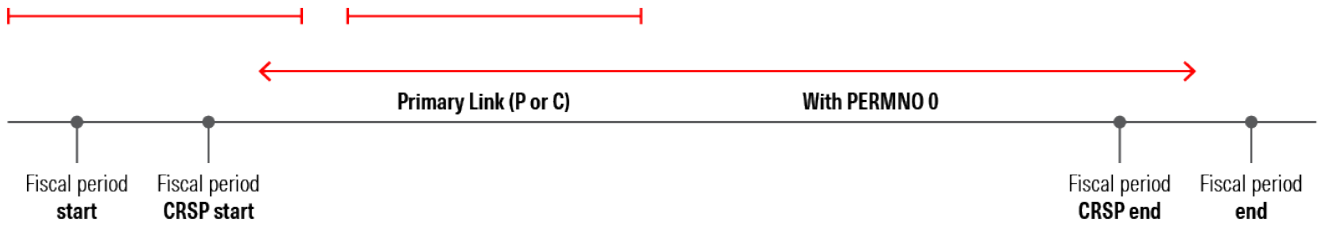

Look for non-primary links (NOT P or C) that have any overlap with the fiscal calendar period. It is possible that there are multiple matches. If so, choose the match with the latest link end date.

©2026 Morningstar, Inc. All rights reserved. The Morningstar name and logo are registered marks of Morningstar, Inc. Marks used in conjunction with Morningstar products or services are the property of Morningstar or its subsidiaries.

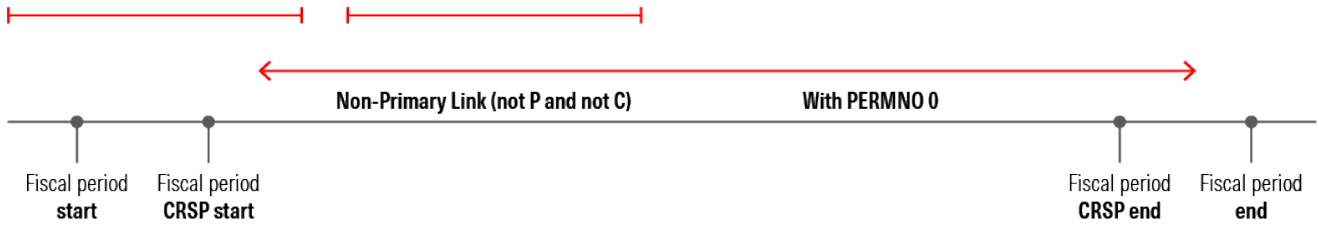

STEP 8

Look for primary links (P or C) in which the PERMNO is 0 that have any overlap with the fiscal calendar period. It is possible that there are multiple matches. If so, choose the match with the latest link end date.

STEP 9

Look for non-primary links (NOT P or C) in which the PERMNO is 0 that have any overlap with the fiscal calendar period. It is possible that there are multiple matches. If so, choose the match with the latest link end date.

STEP 10

Generate a no-link record with 0 for both PERMNO and PERMCO.

About CRSP Research Data Products

Center for Research in Security Prices (CRSP), originally established at the University of Chicago in 1960, is widely recognized as a leading provider of research quality historical market and returns data. Built on rigorous academic standards, its research data products are trusted by academic, commercial, and government institutions worldwide that rely on accurate, transparent data for meticulous financial analysis, economic research, and policy development where precision and historical continuity are essential.

In February 2026, Morningstar completed the acquisition of CRSP, integrating CRSP's research data products—renowned for their academic rigor, historical depth, and accuracy—into Morningstar's global data and research platform. This combination enhances Morningstar's equity research capabilities while continuing CRSP's legacy of providing high quality data to support institutional research, benchmarking, and investment decision making.
